

## The survey

CLASS AND SOCIAL STRUCTURE OF THE POPULATION OF CZECHOSLOVAKIA

IN 1984

### Questionnaire for individuals

#### 1. Sample

The survey was based on the representative sample (18,829 respondents) of the Czechoslovak population of age 15+ which was extracted in three sampling steps (residence - household - individual) from the file originally created for the statistical survey of income (1981). In such a way 21,000 respondents were randomly selected from the original file of 120,000 cases and 200,000 households.
